AC - standard charging // DC - fast charging

(1) net prices € excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session’s start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

| Individual Price Category - DC |                     |                       |                                      |

AC - standard charging // DC - fast charging

(1) net prices € excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

## Tariffs(1) VAB charging network Switzerland (valid as of July 1st, 2026)

AC - standard charging // DC - fast charging

(1) net prices CHF excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

## Tariffs(1) VAB charging network Denmark (valid as of July 1st, 2026)

AC - standard charging // DC - fast charging

(1) net prices € excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time –

if it begins within the fee window, the fee applies even if parts of the parking time fall outside

AC - standard charging // DC - fast charging

(1) net prices HUF excl VAT, valid as of 01-08-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

## Tariffs(1) VAB charging network Ireland (valid as of July 1st, 2026)

| Milence 'truck charging only' | 0,42 | 180 | 0,25 |
|-------------------------------|------|-----|------|

AC - standard charging // DC - fast charging

(1) net prices € excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

AC - standard charging // DC - fast charging

(1) net prices PLN excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

AC - standard charging // DC - fast charging

(1) net prices RON excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside

## Tariffs(1) VAB charging network Sweden (valid as of July 1st, 2026)

AC - standard charging // DC - fast charging

(1) net prices GBP excl VAT, valid as of 01-07-2026

(2) incl. energy taxes and fees

Prices are based on consumed energy (kWh) and time (Min)

(3) a blocking fee depends on the session's start time – if it begins within the fee window, the fee applies even if parts of the parking time fall outside
